

# Social Psychology, dynamics and Communication Design in SN

Dott. David Berti

HKBU Exchange Programme 2015 Seminars, July 27th

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

### OUR GOALS FOR TODAY

- Becoming conscious of the importance of social psychology;

Understand user behavior patterns in order to improve communication strategies;

- Understand why social psychology, communications and design must work together to create amazing results.

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# WHERE ARE WE NOW ?

#### "We currently stand at the threshold of an incalculably large emergent organic information network"

- Andy Fitzgerald, Desiring Ecologies Seminar

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### WHERE'S THE COST ?

#### "Information is cheap. Understanding is expensive"

- Karl Fast

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### ASK YOURSELF THIS

How do you communicate online?

How many communication channels do you prefer the most?

Is your personal image coherent between one channel and another?

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

How can designing communication help us?

1) Facebook users upload 300million photos per day.

2) 2.5 billion content items are shared each day

3) 2.7 billion likes a day

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### 1. GET THE BASICS RIGHT

- brand your page correctly: optimal image dimensions;
- Communicate who you are and what you do
- use bright colors to catch attention;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### 1. GET THE BASICS RIGHT

- change your photo often, add description of services in ad-style manner;
- share stories of your brand;
- promote what you have right now on your business (offers, etc);

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### 2. GROW YOUR FANBASE

- Is your timeline cover photo branded?
- Have you linked you page to your profile?
- Have you secured your custom URL for your facebook page?
- Have you added a like box to your website?
- Do you post from 2 to 5 times a day?

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

3. CREATE MASSIVE ENGAGEMENT

- keep your posts around 80 characters or less. You can receive 27% more engagement rate (source: Buddy Media);

- Your fans have to physically do something: share, comment and get involved in activities (games, competitions, etc)

- Create involvement for your fans into your activities;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

- 3. CREATE MASSIVE ENGAGEMENT
- create engagement with images: photos generate 53% more likes than average posts (Hubspot 2012);
- amplify your potential with whatsapp, instagram, twitter;
- create strategy for your image posts;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### 4. TURN YOUR FANS INTO PROFITS

- listen to what they say and take the time to reply!

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# COMMUNICATING VALUE

- Make core values public and tangible; be transparent!
- What moves you? Let people know what you're passionate about;
- Your values communicate your goals;
- Communicate through design and branding (logos, text, photos);
- Know the best design practices;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

### COMMUNICATING VALUE

- create empathy with your fans;
- live a mindset, don't just talk about it;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# DATA = INFORMATION

True or False?

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

- Understanding context means creating meaning.
- Meaning, when interrelated with other meaning, produces value for people.
- Understanding occurs when interaction happens.
- If we touch things with hands, interactions are more immediate.

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

How does understanding occur? In 2 different ways:

PRAGMATIC
actions performed to bring one physically closer to a goal;
there is a tangible change in the environment;

 EPISTEMIC actions that use the world to improve cognition; there is no change in the environment, but the change is internal;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

Perception is our (neural) map of reality.

Your brain constructs (a subjective experience of) reality.

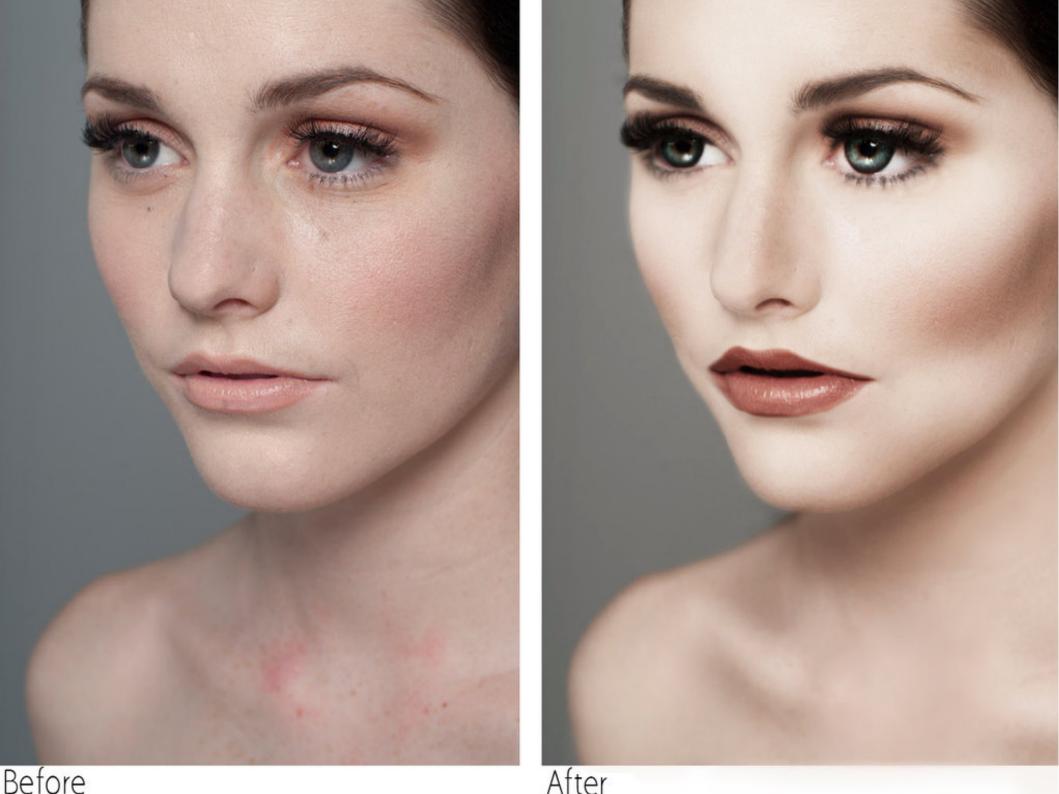

Human brain is really good at expanding the boundaries of what something does or can do.

A LOT of what is visual design makes sense if you think about the brain as a pattern matching machine.

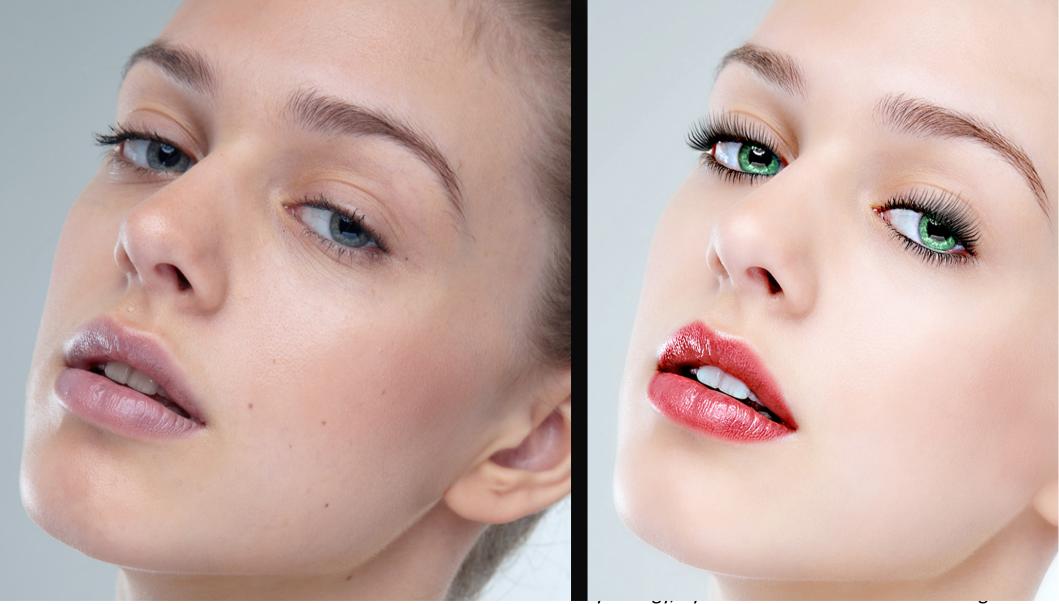

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

d.berti@bembughi.com UX/IA Consultant, Trainer and Author Dipartimento di Matematica e Informatica Università degli Studi di Perugia

How do we approach contents in social networking environments?

There are 3 layers of use:

- **interaction**: what does this imply?
- **information**: how is the information structured and located in order to be experienced by the user?
- cognition: the process of thinking about the artifact

For this dynamics to run, you need the user's mental energy, **his** cognitive surplus.

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### Cognitive Surplus = f (Attention x Time)

cognition is a function of time and attention.

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

When associated with every human activity, products and interfaces have a cost in energy, time, attention and stress

Every single interaction we create has a (bio)cost in human terms

Time we spend doing what a computer could do is wasted biocost. Don't waste time with an old technology if a new one can do something immediately and better.

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

#### ANSWER THIS QUESTION!

# Should we use a productivity app if we spend the majority of our time managing it and setting it up correctly?

(es. configuration, managing settings, adding data day by day, etc).

Yes or No?

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

### THE VALUE OF TIME

Why is time so valuable?

- Time is the most valuable asset we have;
- Time is the only thing we can't save. We always spend it.
- Time is the only thing we can't replace with money. We try to in every job, but the deal is always imaginary;
- how can I objectively tell a monetary value of my time?

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# THE VALUE OF ATTENTION

Why is attention so valuable?

- Attention is valuable because it's a function of time and focus (and it is limited by them).

- focus is biologically limited by psychological and physiological features of our body.

- If our posts ask the user to do too many or too complicated things, this will be highly demanding on the cognitive capacity of the user, which will stop reading the artifact. (for example: if a video or an ad is too long to watch; if a text is too long to read)

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

- Doing traditional things will get you traditional results;

- Care for what you write: copywriting: impacts 38.4% of our business;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

How many users click on Facebook ads?

1) **90,1%** 

2) **59,4%** 

3) **30,5%** 

4) 10,9%

5) **0.5%** 

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

- Only 0.5% users click on facebook ads;

- If you want to reach clients, **email** is the best choice for its efficiency and accuracy and that's why copywriting is still one of the best marketing strategy nowadays;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

- marketing is creating attention and spreading the voice: if you have the attention of your customer, keep it!

For example:

- in your site, add "follow us on facebook", "twitter", "G+" buttons;
- call to action buttons (subscribe, sign up, contact us, ask a quote);

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

 build strong relationship with other brands and people of your same field;

- Analyze what your competitors do in the market;
- Connect people as fast as you can with your services;

- Give lots of value, education and trust so that people want to build a relationship with you;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# HOW TO BUILD ENGAGEMENT

- credibility is the pivot point of persuasion
- credibility is the common denominator of success and influence.

- the perception of a person's credibility is critical to their being recognized as a person of influence.

- you must build (1) **true competence** while building a (2) **perception of competence**: the more well balanced you are with these 2 sides of the same coin, the more you're going to be perceived as an expert

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# HOW TO BUILD ENGAGEMENT

#### THE SIX FACTORS THAT MAKE YOU CREDIBLE (source: Kevin Hogan)

- 1) competence;
- 2) trustworthiness;
- 3) expertise;
- 4) likeability;
- 5) composure;
- 6) sociability;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# **INCREASING COMPETENCE PERCEPTION**

1) stress your education,

2) your position,

3) your experience

4) your communication skills

5) your ability to cite evidence, inoculate the audience to the opposite point of view

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

### **INCREASING COMPETENCE PERCEPTION**

The strategies we undertake constantly have an effect on our environment;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

## PERSONAL CREDIBILITY TIPS

On Facebook:

- 1) 5 Photos instead of 1: +11%
- 2) Wearing sunglasses in your profile picture: +16%
- 3) Description in profile longer than 15 words: +18%
- 4) High quality photo vs non quality photo: +26%
- 5) Saying something playful in the first message: +63%

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# CONCLUSION

1) Experiment as much as possible. Experiment yourself and also analyse the experiments of other people;

2) Watch out for the outcomes you want and spend more time doing things that work;

3) As your certainty increases, increase your investment in the things you're doing well and you will be awarded accordingly;

Dott. David Berti d.berti@bembughi.com UX/ IA Consultant, Trainer and Author

# CONCLUSION

when things are done right, on the outside they look dramatic and revolutionary; inside they are organic, cumulative processes.

There is no miracle moment, just good strategy and consistency, and lots of good steps that buildup in order to produce amazing results.

Never try to skip buildup by jumping too ahead: you'll just crash and burn. Maintaining a consistent direction pays in the long run, never in the short term.

- Jim Collins, Good to Great
